

Bootstrap Lab1

Task 1: Build Your Own Personal Portfolio Page:

Create a responsive portfolio page that introduces you and showcases your personal and professional identity. Use what you learned about Bootstrap layout, content, and forms.

Include these sections:

- **Header** with your name and title
- **Profile image**
- **Contact info** (email, phone, location)
- **Short bio**
- **Skills list**
- **Projects** with brief descriptions
- **Achievements** or certifications

Bonus:

Deploy your portfolio using **GitHub Pages** and share the link with the instructor or in the group!

Task 2: Create Login and Register Forms

Each Form Should Include:

Login Form

- Email
- Password
- “Remember Me” checkbox
- Submit button

Register Form

- Full Name
- Email
- Phone Number
- Date of Birth
- Password
- Confirm Password
- Gender (radio buttons or dropdown)
- Submit (Register) button

note: After pressing the **Register** button, the user should be **redirected to the Login form**.
