

Bootstrap Lab2

- Build an Educational Website Homepage (Single Page)

Objective:

Create a clean, mobile-friendly homepage for an online learning website using Bootstrap components and utilities. You will practice layout, spacing, and basic interactive elements.

Sections to Build:

1. Top Navigation Bar

What to do:

- **Make a top menu.**
- **Add a site name or logo on the left.**
- **Add 3–4 links like Home, Courses, About, Contact.**
- **Make sure it works on small screens.**

2. Hero Section (Big Welcome)

What to do:

- **Add a big title like "Start Learning Today!"**
- **Add a short description under it.**
- **Add a button like “Browse Courses”.**
- **Center everything.**
- **Use a nice background or light color.**

3. Course Categories

What to do:

- **Add 3 columns (in 1 row).**
- **Each one is a box with:**
 - **An icon or image**
 - **A title like “Programming”**
 - **A small description**
- **Use equal spacing between them.**

4. Featured Courses

What to do:

- **Add 2–3 cards in one row.**
- **Each card should have:**
 - **A small image**
 - **Course name**
 - **Instructor name**
 - **A button like “Enroll”**
- **All cards should be the same size.**

5. Student feedbacks

What to do:

- **Add a section with student feedback.**
- **Show:**
 - **A student photo**
 - **Name**
 - **Their comment**
- **Add a carousel to show more than one.**

6. FAQ Section

What to do:

- **Add 3–4 questions.**
- **Use a collapsible box so each answer opens when clicked.**
- **Only one answer should be open at a time (accordion).**

7. Footer

What to do:

- **Add a footer with 3 columns:**
 - **About the website**
 - **Quick links (like Home, Courses)**
 - **Contact info (email, phone)**
- **Use a dark background or a different color from the rest of the page.**
- **Add padding and some space between items.**
